

include/filevault/algorithms  
/symmetric/aes\_ecb.hpp

```
graph BT; A[src/algorithms/symmetric/aes_ecb.cpp] --> B[include/filevault/algorithms/symmetric/aes_ecb.hpp]; C[src/core/crypto_engine.cpp] --> B;
```

The diagram illustrates a file dependency structure. At the top is a header file box labeled 'include/filevault/algorithms/symmetric/aes\_ecb.hpp'. Below it are two source file boxes: 'src/algorithms/symmetric/aes\_ecb.cpp' on the left and 'src/core/crypto\_engine.cpp' on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include this header.

src/algorithms/symmetric  
/aes\_ecb.cpp

src/core/crypto\_engine.cpp
