

```
filevault::archive  
::ArchiveFormat::read  
_string
```

```
graph LR; A["filevault::archive  
::ArchiveFormat::read  
_string"] --> B["filevault::archive  
::ArchiveFormat::read  
_uint32"]
```

A diagram showing a call to `read_string` in the `filevault::archive::ArchiveFormat` namespace. A blue arrow points from this call to another call to `read_uint32` in the same namespace.

```
filevault::archive  
::ArchiveFormat::read  
_uint32
```
