

filevault::cli::ICommand

filevault::core::CryptoEngine

filevault::cli::commands
::SignCommand

engine_

```
graph BT; SignCommand[filevault::cli::commands::SignCommand] --> ICommand[filevault::cli::ICommand]; SignCommand -.->|engine_| CryptoEngine[filevault::core::CryptoEngine];
```

The diagram illustrates the relationships between three classes in the filevault namespace. At the bottom is a grey box representing the `filevault::cli::commands::SignCommand` class. Two arrows originate from this box: a solid blue arrow pointing to the `filevault::cli::ICommand` class box at the top left, and a dashed purple arrow pointing to the `filevault::core::CryptoEngine` class box at the top right. The dashed arrow is labeled with the text `engine_` in a light grey font.
