

filevault::core::CryptoEngine
::CryptoEngine

filevault::core::CryptoEngine
::operator=

filevault::core::CryptoEngine
::CryptoEngine

```
graph LR; A["filevault::core::CryptoEngine  
::CryptoEngine"] --> C["filevault::core::CryptoEngine  
::CryptoEngine"]; B["filevault::core::CryptoEngine  
::operator="] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two white rectangular boxes. The top box contains the text 'filevault::core::CryptoEngine' followed by '::CryptoEngine' on a new line. The bottom box contains 'filevault::core::CryptoEngine' followed by '::operator=' on a new line. Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'filevault::core::CryptoEngine' followed by '::CryptoEngine' on a new line. The arrows indicate that both the class and the operator from the left boxes are being mapped or inherited into the target box.
